1. Class/Seminar Teacher Evaluation

This survey requests your feedback on two separate aspects of your learning experience, split into three sections. The first section asks for your views on your teacher's class/seminar teaching. The second section asks for your views on the course as a whole at this point in time. Finally, the third section asks for some information about you, to aid analysis.

We recognise that this term has been particularly challenging for everyone due to the wider public health situation, with disruption experienced by both students and teaching staff. The School is continually striving to deliver the best possible educational experience despite these challenges and your views about your learning experience at LSE are a valuable source of information about this. The results will be used to help improve the teaching and learning experience for you and your peers and to identify good practice.

The School assumes that your response is broadly positive if you 'mostly agree' or 'definitely agree' with a statement.

1.13) 1.7b Please comment below on aspects of this teacher's class/seminar teaching you think could be improved.

- Answers to more past papers should be provided.
- Could speak slower
- He gives me the most effective ways to solve problems.

- It would be better if the teacher can uncaused some case studies in the session
- Make more exercices on seminars
- NA
- slides were written in a lot of detail so it was hard to follow the slides as well as what the teacher was saying at the same time so it would be a bit better if there was less writing. it would also be useful if the teacher did breakouts rooms to work on small questions as we went through a lot of formulas for this course.

3.27) 2.16 Please comment below on aspects of this course you think were particularly good.

- I liked the fact that we would do practical exams on the classes. Helped a lot to better understand the theory covered in the lectures.
- N/A
- Overall understanding of practical tools such as bond pricing and binomial trees. They are very useful.
- The seminars were very useful, with a committed teacher and good use of the technology to deliver the seminars
- the teacher provides extra supportive slides

3.28) 2.16b Please comment below on aspects of this course you think could be improved.

- I did not like the way the lectures were delivered and the quality of the teaching during the lectures. It would have been much better if he had the possibility to write on his slides to explain the concepts during the live, switch on different ways to convey the ideas and not just reading what is written on the notes.
- Maybe the lecturer can make some notes when delivering the calculation examples in the lecture because it's difficult to follow.
- N/A
- Personally, I would like the course to cover more on macroeconomics or real-life examples.
- The notations used in the lectures seem to be too complicated and not straightforward.
- the accent and intonation of the teacher make me a bit hard to understand what he is saying
